

EXERCISE: 2

COFFEE DAY ORDERING SYSTEM

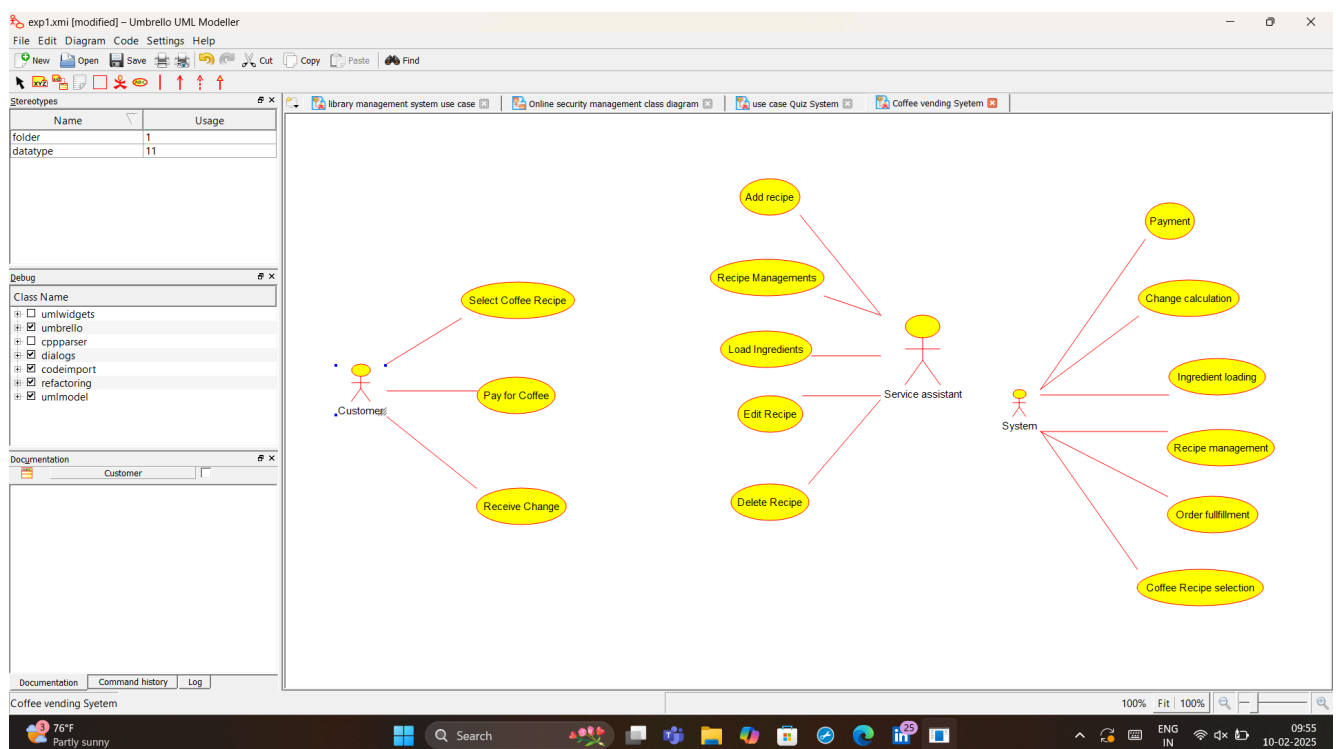

AIM:

To develop a **Use Case Diagram** for a **Coffee Day Ordering System** using **Umbrello** that represents interactions between actors and the system.

PROCEDURE:

1. **Open Umbrello** and create a new **Use Case Diagram**.
2. **Add Actors**: Customer, Service Assistant, and System.
3. **Add Use Cases**: Select Recipe, Pay, Receive Change, Load Ingredients, Manage Recipes, and System Processes.
4. **Connect Actors to Use Cases** with appropriate associations.
5. **Save and Export** the completed diagram.

USE CASE DIAGRAM:

RESULT:

A Use Case Diagram for the Coffee Day Ordering System was successfully developed using Umbrello, representing interactions between the Customer, Service Assistant, and the Coffee Machine System.
